Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

A persistent weather pattern will remain in place for the next few days. There will be a slight chance of thunderstorms across the Trinity Alps each afternoon and evening each afternoon through the middle of next week. The interior can expect above normal temperatures while the coast should anticipate overnight low clouds and fog.

San Francisco Weather:

Typical summer weather pattern forecast across the region with coastal low clouds and fog extending into the valleys during the night and morning hours. Otherwise mostly clear skies and dry weather is expected. A gradual cooling trend is forecast for the inland valleys over the next few days.

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY

Sacramento Weather:

Another day of hot temperatures today but with a gradual cooling trend into early next week. A return to Sierra showers and thunderstorms is possible next week.

Hanford Weather:

High pressure ridge over the four corners region will bring another day of well above normal temperatures to the district. A northwestward surge of monsoonal moisture tonight through Sunday will bring an increased threat of thunderstorms to the mountains and desert. A few thunderstorms could drift into the foothills and east side and south end of the San Joaquin Valley later this weekend.

WEATHER

WEATHER SYNOPSIS BY REGION:

SOUTHERN CALIFORNIA:

Los Angeles Weather:

High pressure will keep temperatures above normal through the weekend. Monsoonal moisture will bring a chance of thunderstorms to the mountains and deserts through Saturday and to most of Los Angeles County and the coastal waters Sunday. Night and morning low clouds will affect much of the coast through the period.

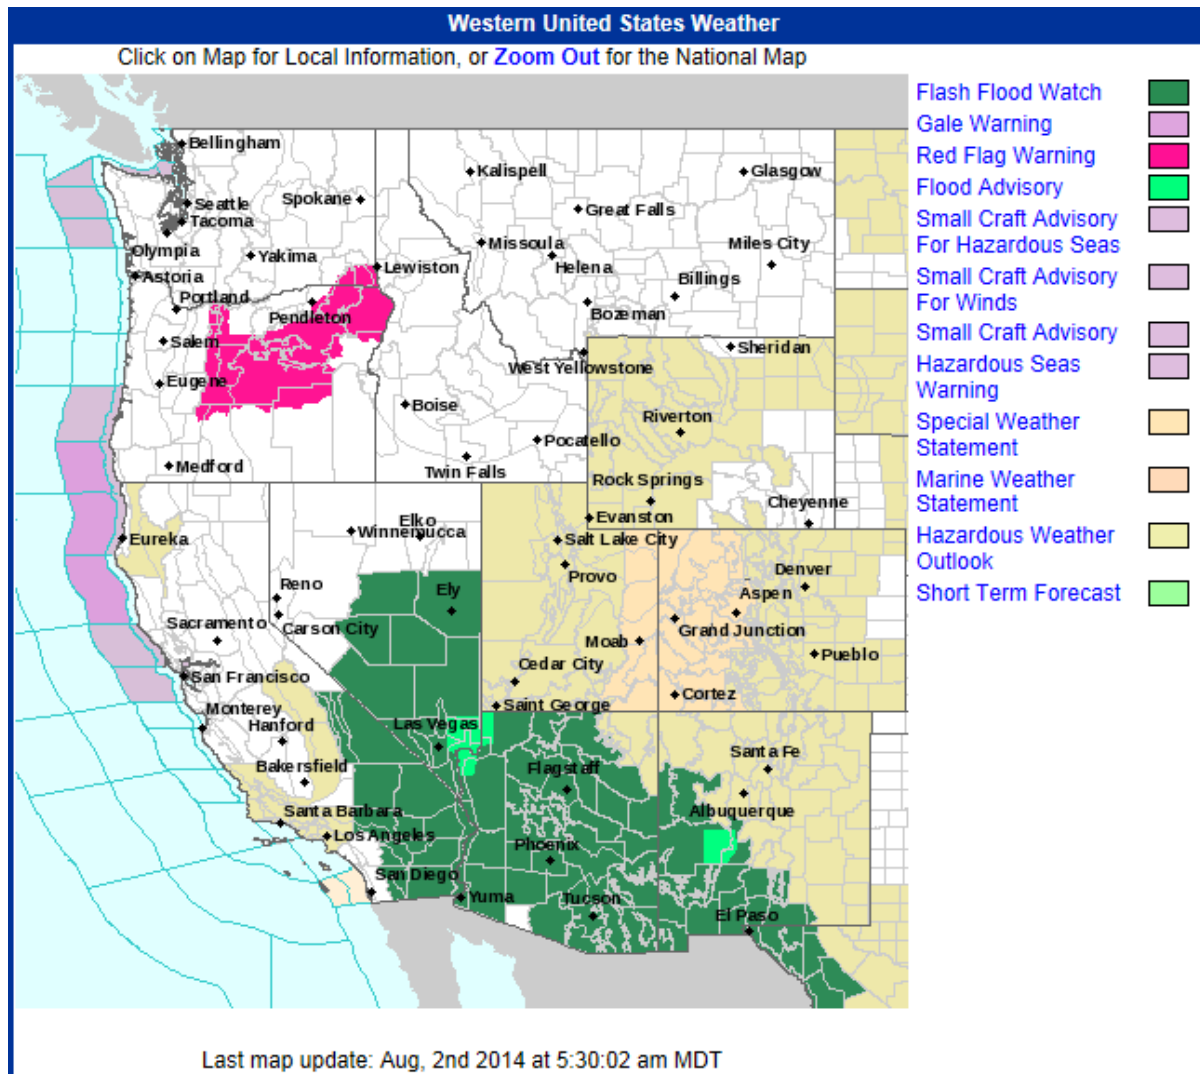

Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

Upper level low pressure will move over southern California and help generate showers and thunderstorms at times over the weekend. Greatest precipitation amounts will be in the mountains, but some precipitation could occur along the coast as well, especially late Saturday through Sunday. There is a threat for flash flooding mainly in the mountains and deserts Saturday into Saturday night. Cooler but humid weather will prevail over the weekend. Low pressure will move north out of the area by Monday with fair weather, slightly below normal high temperatures and areas of night and morning coastal low clouds for most of next week.

Southeast California Weather:

Increasing thunderstorm coverage with a risk of heavy rain can be expected today and Sunday as deeper moisture and a potent upper level disturbance move in from the south. This will be followed by a drying trend from southwest to northeast early next week.

CAL OES ACTIVATIONS

Cal EOC Incident – 2014 Drought

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is Monday – Friday, 0800-1700 hours.

Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- On 7/15/14 the State Water Resources Control Board passed a new emergency regulation to reduce outdoor urban water use. The regulation makes an exception for health and safety circumstances. Local agencies can ask courts to fine water users up to \$500.00 a day and the SWRCB can fine water agencies up to \$10,000.00 per day. The adopted regulations are expected to go into effect by August 1, 2014 and remain in effect for 270 days.
http://www.waterboards.ca.gov/publications_forms/publications/factsheets/docs/emergregsurban_fs072214.pdf
- Current Reservoir Levels continue to decline. Pine Flat had a 5% decrease from last week. Levels as of July 30: Don Pedro 44%; Exchequer 21%; Folsom Lake 42%; Lake Oroville 36%; Millerton Lake 53%; New Melones 26%; Pine Flat 14%; San Luis 23%; Lake Shasta 35%; Trinity Lake 36%; Pyramid Lake 93%; and Castaic Lake 47%.

Situational Summary

- **Drought Top Environmental Concern of Californians, PPIC Report Finds:** A newly released survey by the Public Policy Institute of California (PPIC) reveals that drought and wildfires are at the top of the list of public worries about the impacts of global warming. The survey also found that 75% of respondents believe public water agencies should require residents to reduce water use.

Tour the California Urban Water Conservation Council's interactive [H2ouse](#) to learn more ways to save water indoors and outdoors! <http://www.saveourh2o.org/tips> In early August 2014, the Save Our Water campaign will launch a new microsite and additional drought-specific PSAs in Spanish.
- The 2014 Governor Drought Task Force continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
- The DWR has released a list of unmonitored high and medium priority groundwater basins. As outlined in California's Water Code, some counties and groundwater management agencies in unmonitored basins may be ineligible for water grants and loans administered by the state.
